Slatted Bed Frame – Black Charm

Innovative slatted bed frame with 5 comfort zones and a new design that prevents the mattress from reaching the solid base of the frame.

Thanks to the more elastic slats and softer slat caps, tension in the shoulders is released, and the neck remains in an upright position. This modern system allows the lifting of the slats in the lumbar area, which helps the body to stand in a comfortable position for us.

ROSSMARI

Orthopedic

Low-orthopedic

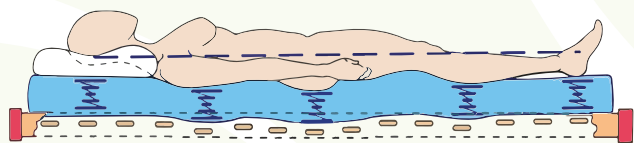

Why we need the slatted bed frame?

100% orthopedic

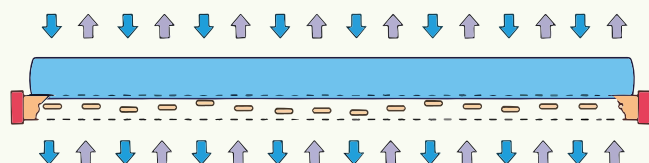

The slatted bed frame ensures the correct and orthopedic posture of the body.

Durability

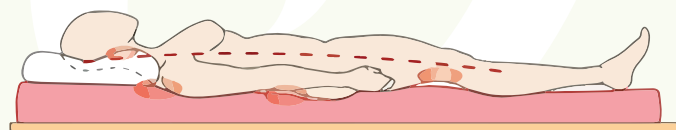

Proper use, including a slatted bed frame, leads to a longer mattress life.

Better air circulation

It is important for the mattress to have air circulation to prevent from dust mites and microbes.

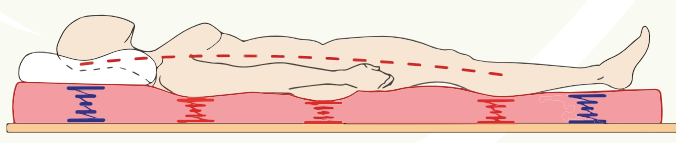

What we lose for not using slatted bed frame?

50% orthopedic

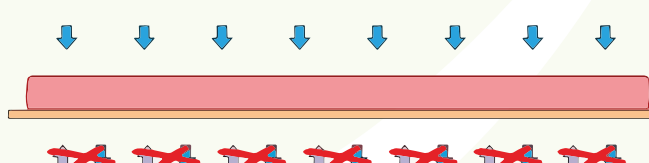

Without the slatted bed frame, the correct and orthopedic posture of the body is not ensured.

Short life

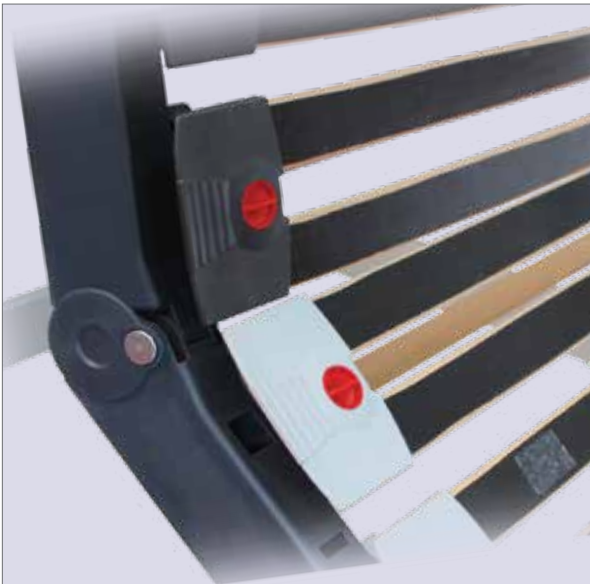

Improper use, without a mattress frame, leads to a shorter life of the mattress.

No air circulation

When there is no air circulation, the mattress holds dust mites and microbes inside.
